RUAG Cyber Security

Information Security and Compliance Services
ISO 27001 Based ISMS

RUAG Cyber Security specialises in Information Security Management Systems (ISMS) and services. Intuitive ISMS software combined with the expertise and experience of our ISMS experts will accelerate an ISO/IEC 27001 compliance initiative, while transferring knowledge to the organization's IT security team.

Once implemented, RUAG's ISMS for ISO/IEC 27001 compliance solution can be augmented with further modules to assist IT Emergency Planning and Data Protection, providing an effective solution to multiple aspects of information security.

Business Challenges

Information security is an increasing challenge for all businesses. Today's IT Security teams need to be able to prove to both internal and external stakeholders that critical information is adequately secured and protected from cyber threats with effective and reliable technology and processes. For many organizations this proof is required before compliance certification or recertification is achieved. IT and audit departments are frequently overstretched and do not have the required resources to initiate an appropriate project and bring it to fruition.

Solution

RUAG Cyber Security Services provides a complete approach to implementing an ISMS for ISO/IEC 27001 compliance. With the support of security experts who have a proven implementation process together with a leading software solution, an information security compliance programme can be initiated quickly and effectively. Leveraging independent external resources, the project can have minimal impact on internal personnel, while a comprehensive knowledge transfer programme ensures that the solution can be effectively maintained after the initial project concludes.

The solution offers build in logic and step-by-step guidance with easy to follow instructions. Ready-made content, pre-defined templates and reports enable a fast start to the project identifying where improvements are needed and ensuring requirements are met for compliance to be achieved.

Key Features and Benefits

- Leading Information Security Management System implementation with specialist support from experts throughout the project
- Built in consulting logic and intelligence enables a simple step-by-step and self-paced implementation based on business requirements
- Proven procedures, ready-made content and customisable templates (pre-filled) which are industry and sector specific
- Minimises internal resource requirements required to implement the project
- Process documentation and optimization
- Reports for audit and certification

- Cornerstone solution for compliance regulations and contractual requirements (in some sectors)
- Customised support service to gain maximum effectiveness and ROI from the ISMS
- ISMS implementation and ongoing maintenance
- Ongoing proof to customers and partners of commitment to information security
- Solution design, documentation and implementation to match ISO 27001 controls
- Compliance pre-audit and audit support
- Clearly defines responsibilities and roles creating culture of information security and resilience

Scenarios

ISO/IEC 27001 Compliance

Certain industries now require ISMS certification to ISO 27001. RUAG can provide both personnel and the software solution to achieve this compliance. By using a comprehensive framework, specific legal, regulatory and contractual requirements can be effectively met. Full compliance will show to customers and partners the commitment an organization has to information security as well as building an internal culture of security and resilience.

Other Information Security Services

The ISMS for ISO/IEC compliance can be enhanced to cover other information security areas, such as IT Emergency Planning and Data Protection. Integrated options to the ISMS reduce time to implement and increase the ROI achieved for these projects.

Data Protection Officer / Chief Information Security Officer as a Service

In addition to providing specialist personnel for an ISMS project, RUAG can also offer full or part-time personnel to fulfil the roles for Data Protection Officer (DPO) and Chief Information Security Officer (CISO). These services can be provided as medium or long term service assignments.

Pricing

Pricing starts at €25,000 and includes software licensing and consulting services but is dependent on the scope of the project.

Why RUAG Cyber Security Services

RUAG Cyber Security Services have grown out of high profile engagements with the Swiss Government, operating in highly secure environments with specialist personnel. A consistent approach to projects of all sizes ensures a high-quality, on-time, on-budget deliverable which is tailored to the customer's specific needs.

Customers for ISMS include government departments, manufacturers, engineering services, telecommunication providers, software development businesses and energy providers.
