

Clearswift SECURE Web Gateway

End of Life Statement for Version 4.5

Weber Röss, Global Product Manager

14th November 2017

End of Life

This End of Life Statement announces the end of life for the Clearswift SECURE Web Gateway version 4.5.

Twelve months from the date of this statement, on the 14th November 2018, maintenance support for version 4.5 will cease to be provided.

New SECURE Web Gateway version 4.7

Clearswift SECURE Web Gateway version 4.7 will be released on the 14th November 2017 and will incorporate the following new capabilities:

- Client Identification Headers
- HTTP Performance Improvements
- GDPR EU Regional (PII) Policies
- STIG hardening
- Sanitize and Redact JPEG image properties
- Support for MindManager Files
- Support for additional network interface controllers (NICs)

Version 4.7 will be available as a free upgrade to all supported customers. To benefit from the new features included in this release, and important bug fixes, we advise all customers to upgrade to version 4.7 as soon as possible.

Summary of Key Points

From the 14th November 2017:

- Clearswift SECURE Web Gateway 4.5 starts End of Life program on 14th November 2017
